

JAY PATWA

Data Scientist | Data Analyst | Python Developer

patwajay2101@gmail.com | 9998880800 | Ahmedabad, Gujarat | [Github](#) | [Linkedin](#)

PROFESSIONAL SUMMARY

Detail-oriented and motivated Data Scientist and Data Analyst with hands-on experience in Python, SQL, Power BI, machine learning, and exploratory data analysis. Proficient in building end-to-end data pipelines, predictive models, and interactive dashboards that drive data-driven decisions. Strong foundation in statistics, data wrangling, and data visualization. Seeking an internship or entry-level role in data science or data analytics where I can apply analytical thinking and problem-solving skills to deliver business value.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, C, C++

Data Science & ML: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Data Visualization: Power BI, Matplotlib, Seaborn, DAX

Statistics: Descriptive Statistics, Inferential Statistics, Probability Distributions, EDA

Databases: MySQL, MongoDB

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, MERN Stack

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Postman, Vercel, Render

Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork, Attention to Detail

WORK HISTORY

AI/ML Intern

June 2026 – Present

Unada Labs, Ahmedabad (6-Month Internship)

- Working on diffusion models and ComfyUI-based pipelines as part of a 6-month AI/ML internship.
- Contributing to real-world AI/ML projects, gaining hands-on industry experience in applied machine learning workflows.

Python & Machine Learning Intern

July 2024

Codsoft (Remote Internship)

- Developed and implemented Python-based machine learning models as part of a structured one-month internship program.
- Applied data preprocessing, feature engineering, and model evaluation techniques using Scikit-learn and Pandas.
- Collaborated on real-world datasets to build classification and regression solutions, demonstrating practical ML skills.
- Received Internship Completion Certificate upon successful delivery of assigned projects.

PROJECTS

AirSense: AQI Prediction & Monitoring System | Python · Scikit-learn · IoT · ESP32 2025 – 2026

- Built an end-to-end air quality monitoring system integrating ESP32 IoT sensors to collect real-time PM2.5 & PM10 data wirelessly.
- Trained a machine learning model using Scikit-learn to predict AQI levels with strong accuracy on collected sensor data.
- Designed an interactive data visualization dashboard in HTML/CSS/JavaScript for real-time and predicted AQI monitoring.

Sales & HR Analytics Dashboard | Power BI · SQL · MySQL · DAX 2024 – 2025

- Designed an interactive Power BI dashboard analyzing 10,000+ rows of sales and HR data, surfacing KPIs and business trends.
- Wrote advanced SQL queries — JOINS, CTEs, and window functions — in MySQL to extract, clean, and transform raw data for analysis.
- Built DAX measures for revenue growth %, employee attrition rate, and regional performance with drill-through and slicer filtering.
- Automated reporting workflows, reducing manual effort and delivering stakeholder-ready data visualizations.

RetailSense: Exploratory Data Analysis on Superstore Sales | Python · Pandas · NumPy · Matplotlib · Seaborn

2024 – 2025

- Performed end-to-end EDA on the Superstore Sales dataset (9,994 rows, 21 columns) using Pandas and NumPy — handled data types, converted date columns, and verified zero null values.
- Analyzed sales, profit, and discount patterns across categories and regions — identified that Technology leads in revenue (>₹8.36L) while Furniture has poor margins due to high discounting (avg 17.4%).
- Built 8+ visualizations (histograms, scatter plots, bar charts, line graphs, heatmap) using Matplotlib and Seaborn — proved negative correlation (-0.22) between discount and profit, and identified strong Oct–Dec seasonality in sales trends.
- Delivered 7 actionable business recommendations including revision of discounting strategy and regional focus — project published on GitHub with structured notebooks, saved visualizations, and detailed README.

AgastyaHomes: Full-Stack Property Rental Platform | MERN Stack · REST API · MongoDB 2023 – 2024

- Developed a full-stack MERN property listing platform with Google OAuth 2.0 authentication and Cloudinary image management.
- Built RESTful APIs using Node.js and Express.js; deployed on Render with MongoDB as the scalable backend database.

EDUCATION

B.Tech in Computer Engineering CGPA: 8.6 / 10

Indus University, Ahmedabad | 2022 – 2026 (2026 Batch)

CERTIFICATIONS

- Foundation of Mathematics in AI & ML — Indus University (March 2026)
- Python & Machine Learning Internship Completion Certificate — Codsoft (July 2024)
- Certificate Course in Upskilling Internship — Indus University (Dec 2023)

- SQL (Advanced) Certificate — HackerRank (June 2026)
